

**Bob Levitan**, Staff Hydrologist

Bob has over 25 years of work experience in hydrology and geology, with a focus on river system modeling as it pertains to irrigation development and conservation efforts. He received his BA degree in Geology from the University of Montana in 1982, and subsequently worked overseas helping to develop a drinking water system from groundwater sources to augment the existing polluted and drought-plagued surface water system.

Bob was employed by the Montana Department of Natural Resources and Conservation for 22 years beginning in 1990. He worked as a hydrologist advising the Reserved Water Rights Compact Commission in their negotiations with Federal entities claiming water rights within the boundaries of State of Montana.

Some of Mr. Levitan's broad range of experience includes:

- Peace Corps Volunteer, Micronesia 1983 - 1985
- Manager of Pohnpei Water and Sewer Systems

bob

- Pit Geologist / Ore Control Specialist, Pangea and Pegusus Basin Creek Gold Mine
- Cabinet maker and Stained Glass Artist
- Licensed Practical Nurse

Raised and educated in Montana, Bob has always been an outdoor enthusiast. Bob took a five year hiatus to travel abroad. Travel and outdoor activities continue to be favorite activities.
